

Evidence Capture Anywhere.

Securely channel shift evidence capture. Reduce contacts, make decisions faster, improve performance.

You don't need expensive software and a dedicated scanning team to capture evidences right first time. With BECS Scan, you can channel shift evidence capture to authorised Customer Service staff, trusted partners and even self-service to customers!

BECS Scan provides highly secure, browser-based evidence capture on desktop computers and mobile devices. It enables you to reduce the cost of rollout whilst protecting your internal systems.

Using any capture device (scanner, digital camera, smartphone, etc.), BECS Scan enables Council staff and designated partners to quickly and easily capture and transfer evidences electronically to the back office.

The self-service feature allows customers to capture their own evidences and attach them to their application where appropriate.

- Saves scanning, photocopying and postage costs
- Provides more convenient locations for customers to present evidences and reduces the time to payment
- Driven by the Evidence Check List, including local Risk Based Verification rules, during or after data capture
- Understands original document vs. photocopy requirements
- Allows users to preview and crop captured images
- Outputs a Missing Evidence List to facilitate multiple visits
- Restricted search for non-Council staff to protect privacy
- Countermeasures to prevent service from being abused as a general image server, with encrypted images that can only be accessed by the Council
- Automatically indexes into your Document Management System and associates evidences with the customer's application
- Ideal for home visits, Benefits counter, one stop shops, RSL's

Team Netsol.

Excellence in technology.
Excellence in customer service.

Team Netsol Limited is an innovative IT company based in the UK that delivers effective, scalable solutions to the private and public sectors.

We manufacture outstanding solutions using the latest enterprise-level technologies.

Our clients benefit from a wide range of expert consultancy and project management services which empower them to drive up service levels to their customers whilst driving down the total cost of ownership.

Over 80 Local Authorities use our solutions to drastically improve their performance, reduce costs and increase the number and quality of their public channels.

Our core technologies powered the success of Scotland's 2011 Census, the first national population census in the UK to be conducted online.

Team Netsol remains as ever committed to excellence in the delivery and support of Central and Local Government projects.
